

## INTERNET SOURCES

# CRAAP

Review websites and web content for validity and reliability with a few quick questions.

### Is it **CURRENT**?

When was this last updated?  
Do I need current information for my topic?

### Is it **RELEVANT**?

What does this have to do with my topic?

### Is it **ACCURATE**?

What references does the writer provide?

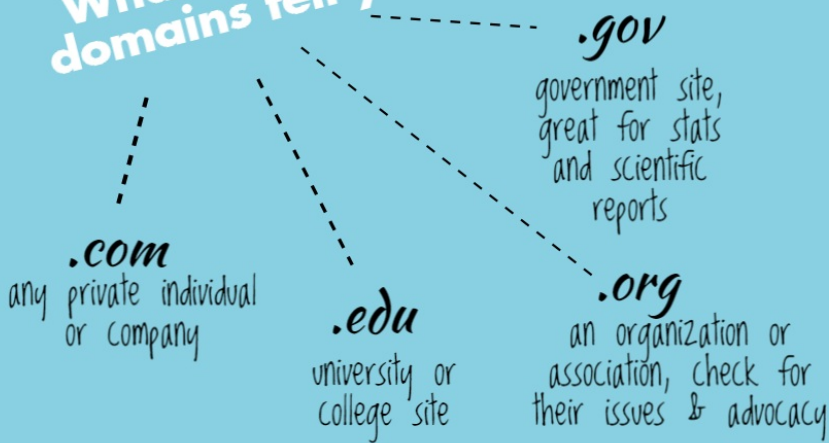

### What **AUTHORITY** does the writer have?

Is the writer a credible source on this topic?

### What is its **PURPOSE**?

Why did someone write this?  
Is the website a stakeholder in the claim?

### What common domains tell you

### Tip

Research is process of trial and error.

To find the best results, try your search different ways: use different terms and search different websites.
